WINTER.

BY A. B. STREET. A sable pall of sky,-the billowy bills, Swath'd in the snowy robe that winter throws So kindly over nature-skeleton trees, Fring'd with rich silver drapery, and the stream Numb in its frosty chains. You rustic bridge Bristles with icicles; beneath it stand The cattle group, long pausing while they drink From the ice-hollow'd pools, that skim in sheets Of delicate glass, and shivering as the air Cuts with keen, stinging edge; and those gaunt trunks, Bending with ragged branches o'er the bank, Seem, with their mocking scarfs of chilling white, Mourning for the green grass and fragrant flowers, That summer mirrors in the rippling flow Of the bright stream beneath them. Shrub and rock Are carv'd in pearl, and the dense thicket shows Clusters of purest ivory. Comfortless The frozen scene, yet not all desolate. Where sleeps, by tree and bush, the beaten track, The sleigh glides merrily with prancing steeds, And the low homestead, nestling by its grove,

The drenching rain Had fallen, and then the large loose flakes had shower'd Quick freezing where they lit; and thus the scene, By winter's alchymy, from gleaming steel Was changed to sparkling silver.

Clings to the leaning hill.

Yet, though bright And rich the landscape smiles with lovelier look When summer gladdens it. The fresh blue sky Bends like God's blessing o'er; the scented air Echoes with the bird songs, and the emerald grass Is dappled with quick shadows; the light wing Of the soft west makes music in the leaves, The ripples murmur as they dance along; The thicket by the road-side, casts its cool, Black breadth of shade across the heated dust. The cattle seek the pools beneath the banks, Where sport the gnat-swarms, glancing in the sun, Gray, whirling specks, and darts the dragon-fly, A gold-green arrow; and the wandering flock Nibble the short, thick sward, that clothes the bank, Down sloping to the waters. Kindly tones, And happy faces make the homestead walls A paradise. Upon the mossy roof The tame dove coos and bows; beneath the caves The swallow frames her nest; the social wren Lights on the flower-lin'd paling, and trills through Its noisy gamut; the humming-bird Shoots, with the flying harp, the honey bee, 'Mid the trail'd honeysuckle's trumpet bloom. Sunset wreathes gorgeous shapes within the west, To eyes that love the spleador; morning wakes Light hearts to joyous tasks; and when deep night Breathes o'er the earth a solemn solitude, With stars for watchers, or the holy moon, A sentinel upon the steps of heaven, Smooth pillows yield their balm to prayer and trust. And slumber, that sweet medicine of toil, Sheds her soft lews and weaves her golden dreams.

public act, and enable us to define the character of the eminent men who devised the Federal Constitution, and of the generation which adopted it, will enable us to decide, in some degree, how far the it. Tried by this test, we admit the Federal Constitution is a double distillation of absolute monarchy, and the veto power is a specimen of despotism borrowed from the Grand Turk or the Grand Lama; and therefore Mr. Clay is right in wishing to abolish it, and all good democrats ought to aid him in constructing something more republican. Among its framers, the foremost is Washington, the President of the Convention. Every body knows that he was a rank monarchist, selfish, haughty, austere aristocrat, descended from a family distinguished for its devotion to Charles I., and who, when he was appointed commander in chief of the American forces, by those incorrigible old Tories, the Continental Congress, devoted his " life, fortune and sacred honor" to the cause of arbitrary power, pose that such a man would preside over a convenwith any other basis than absolute monarchy. Therefore we must not look for republicanism in any constitution proceeding from the hands of such Franklin, an aristocrat "of he straightest sect," tyrant, who, throughout a long and active life, insisted that the people were a " swinish multitude," who had " nothing to do with laws but to obey them, or with taxes but to pay them." He probably inherited his aristocracy from his puritan ancestors, who were of the old Pilgrin stock. Then we have James Madison, the very personalication, the beau ideal of a despot. This man be leved that all mankind were made for his own use, and could not be farmers, a set of abject, cringing, fawning slaves Frederick Bank, Md., robbery comproto absolute monarchy, who would fly into a passion mised by Bill Wiley, at the very mention of human rights.
